45-Day Remember-Me-On-Device Option

A Remember-Me-On-Device (RMoD) option with a 45-day expiration period is available to users with the Multi-Factor Authentication (MFA) service. Once the user logs in to the application on a particular device, the user is not required to log in to the application again for 45 days.

The 45-day RMoD option is not available to administrative users who have access to configuration settings and/or security features that can systemically alter the application. For administrative users, a RMoD option with a 24-hour expiration period is available.

Administrative users who wish to take advantage of the 45-day RMoD option will need to set up a second user account that does not have administrative user permissions.

RTIconnect Administrator Users

For RTIconnect, an administrator is any user who can access:

• System options (Settings > General Parameters > Options).
• Menu configurations (Settings > General Parameters > Menu Designer).
• Security Group settings (Utilities > Security > Groups tab).

These user accounts are not eligible for the 45-day RMoD option.
